Manshuin Monzeki - Special Admission 2025

Since the Enryaku era in the late 8th century, Manshuin Monzeki has walked through the ages with quiet dignity as a temple of imperial heritage. In the tranquil northern hills of Kyoto, its gardens, architecture, and cultural treasures have long created a timeless world of richness within stillness.

This autumn welcomes the first homecoming and public unveiling of the Grass and Insect Scrolls, alongside contemporary art exhibitions and night viewings — moments where tradition and creativity meet in serene harmony. Amid the radiant autumn leaves, we invite you to encounter the beauty and quiet flow of time that dwell within Manshuin's silence.
